RE: CITY OF BROWNSVILLE MS4 PROGRESS REPORT FOR APRIL 2015

Dear Mr. Scott,

On December 4, 2014, you and Conner Franklin met with Jerry McClinton and me to discuss the current status of the City of Brownsville's MS4 Program and the City's plans to obtain and maintain compliance with its MS4 permit. On December 5, you sent a letter to Jerry McClinton requesting monthly progress reports. Since that time, monthly progress reports have been submitted. Activities occurring in April are discussed below.

Note that, as reported previously, the City created a Storm Water Manager position in 2015 to better address the Permit requirements. The City's Storm Water Manager is now Lauren Patterson. Her e-mail address is LPATTERSON@BROWNSVILLETN.GOV and her phone number is (731) 772-1212. Jerry McClinton continues to be involved with overseeing Lauren's work and assisting as needed.

For the month of April, the following activities occurred:

- The March MS4 Progress Report was submitted on April 21, 2015 (dated April 16, 2015).
 - Jerry has continued to maintain the construction site inspections and is training Lauren.
 - Lauren is in the process of signing up for additional training, including the Tennessee Erosion Prevention and Sediment Control (EPSC) Level I and Level II classes.
 - Lauren and I have communicated to coordinate the Visual Stream Assessment field work beginning in the Spring. In addition to being the Storm Water Manager, Lauren is developing the City's GIS capabilities. She is in the process of obtaining and referencing databases of the road and stream network to be utilized for the VSA.
-

- Lauren attended the "Tennessee Building Officials Association" (TBOA) conference in Memphis, which ran from April 26th through April 29th.
- I have been in communication with TDEC personnel to ensure that Brownsville will submit the appropriate information in the correct format to comply with the "Protection of State or Federally Listed Species" requirement (Section 3.2) in the State of Tennessee NPDES permit for Small Municipal Separate Storm Sewer Systems. The web search has indicated that there are no aquatic species listed in the City. I am working with TDEC to get the appropriate certifications from the Fish and Wildlife Service (FWS). On April 16, 2015, Steven Alexander of the Fish and Wildlife Service sent a list of information that they would like provided for the FWS in order to provide a letter of their assessment of the efficacy of the City's Storm Water Program related to the Endangered Species Act. Lauren and Tom are in the process of compiling the information for the FWS.

Please let me know if you have any questions or wish to further discuss this report. You may also contact Lauren Patterson at 731-772-1212.

Sincerely Yours,

Thomas B. Lawrence, PE
